**Contents:** The majority of the questions asked in the Childhood Drowning Questionnaire, including the case, control and adolescent questions are included in EXTD\_F. Only one record per ID exists in this table, identified by key fields BASEID and ENUMNUM. This table also includes some of the housekeeping variables used during data collection. Types of variables included are final result code, date of completion, type of interview (case, control, adolescent), age group, Spanish or English flag and short form flag. This table also contains the variable "CASEID", which links up a CASE/CONTROL set and the "DISTANCE" variable which contains the distance between each case and control.

**Key Fields for Analysis:**

Variable	Description
BASEID	Unique ID assigned to all cases controls and adolescents. The BASEID for cases links to CASEID in the CASE_F. The case BASEID's start with "1" and the control and adolescent BASEID's start with "2".
ENUMNUM	This is a person identifier. ENUMNUM is 01 for cases and controls and 02 for adolescents.
MAINRSLT	Completion Code for CATI data included in the delivery. C1 = Case C2 = Control C3 = Adolescent CI = Complete, but Ineligible CP = Partial Complete
TYPEINTV	Type of extended interview 1 = Case 2 = Control 3 = Adolescent
SHRTFORM	Short form 1 = yes 2 = no
AGETYPE	Age group 1 = 1-4 2 = 5-9 3 = 10-19
CASEID	Where TYPEINTV = 1 (CASE) CASEID = ID of case Where TYPEINTV = 2,3 (CONTROLS) CASEID = ID of case that control links to
